

How to install JSI ?

Contributed by Rich Roth
Last Updated Tuesday, 25 December 2007

WARNING: the JSI IS IN ALPHA RELEASE

MAKE SURE TO BACKUP YOUR DATABASES AND SITE BEFORE TESTING THE JSI

OK you have been warned realistically we have never clobbered a Joomla install so far

Installing the Joomla Smart Installer

To install JSI and setup the JSI, you:

- a) Download com_jsi.zip component from [here](#)
- b) Install the com_jsi component
- c) Use the JSI menu option to 'Fetch full installer'
- d) Use the 'Smart menu installer' to find an install the extensions you want

If your system administrator has created a local repository for you:

a) Select Components / JSI / Configure

b) Enter the URL for the repository
